Revolution in the Field of Technology

Technological Singularity!

We are Sousri Technologies engaged in developing chip attachments to the existing electrical and electronic devices to draw Electricity from the atmosphere.

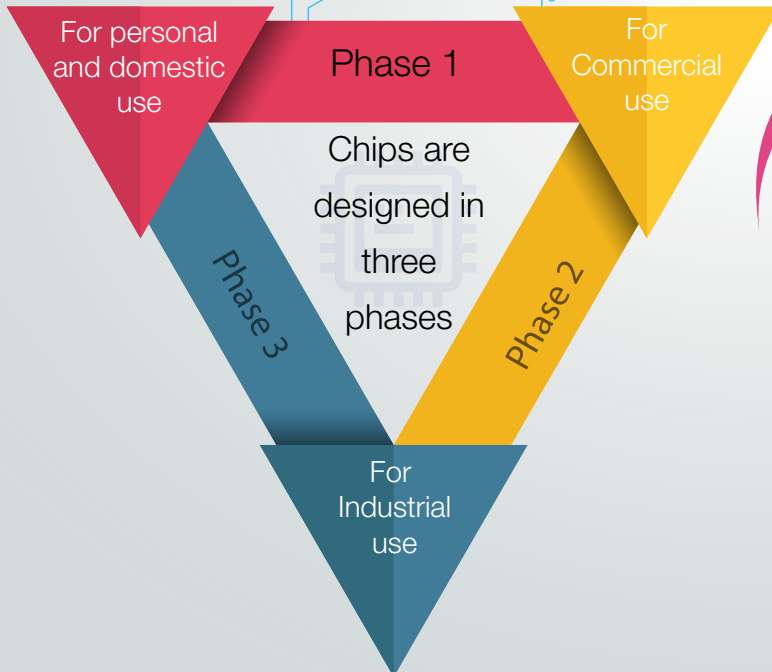

ABOUT THE PRODUCT

- We make power chips and power routers.
- The power chip converts the Higgsboson absorbed from the atmosphere into electricity and supplies it to the devices.
- Chips have plugs and USB type connectors, to enable our customers use the power at their place
- The above products of ours are easy to install and use by connecting to your devices.

HOW DOES THE PRODUCT WORK?

- The Chip traps Energy from the atmosphere and converts into Electricity
- The Electricity thus generated will pass through a router
- The Router passes the power to the Machine or equipment or device it is attached
- End user's machine uses that power to run
- Global application as atmosphere is available everywhere on the globe

WHY THIS PRODUCT?

No short circuits and damages.

Eco-friendly, Does not cause pollution.

Not harmful to humans or any living being.

Third party services like pillars, transformers, towers, switches, buttons, wires etc. are not required

No power drop down as cables or transformers are not used

Easy to provide for anyone at any time.

24/7 Power. Power is controlled by a remote controller.

Works even in rains, storms, disasters or any kind of calamities.

BENEFITS TO CUSTOMERS

PATENT TITLE

A SYSTEM TO RECEIVE HIGGS
BOSONS PRESENT IN THE FORM
OF ENERGY IN THE
ATMOSPHERE AND GENERATE
ELECTRICAL ENERGY

INDIA PATENT NUMBER
398776

INTERNATIONAL PATENT APPLICATION NO
PCT/IN2020/050568

DATE OF GRANT
08-06-2022

STATUS
PRE-COMMERCIAL

SELECTION OF THE TECHNOLOGY CATEGORY

Cloud Energy or Automotive

Mobility Industrial Manufacturing Internet of Things (It)

Smart Home Led Lighting

Opto Electronics or Semiconductor Manufacturing

Equipment Wireless

Telecommunication

Sousri Technologies Private Limited
