

To  
Our Business Partners,

Request Regards,

**Sub: Request regarding support for my research to the proposal for a joint undertaking. (Patent granted from Govt of India and Worldwide Patent Filed) that brings revolutionary change in technology.**

I am Basoji Suresh Ram from India. Being a hobbyist in the science research, discoveries and innovations working since my student life. Based on the study I have sent my research thesis to Starmus Festival organizers and was one of the invitees to attend Stramus Festival, a biannual event held in Spain in which renowned scientists from all over the world attended including the celebrity scientists like late Dr. Stephen Hawking and Neil deGrasse Tyson. I published a book on the Universe entitled, "Universe, My Universe and I am the Universe ".

I have an innovative idea which will be beneficial to all humankind.

My idea is about converting the energy in the atmosphere to electric energy which can be used by equipment. And this will be done with the help of a power chip, router and remote controller. The chip attached to equipment absorbs the energy from the atmosphere and converts it to electric energy which can be used to run the equipment or charge devices.

It will provide a continuous supply of power without external connections.

Patent is granted in India and filed for a world level patent for this innovative idea and NOC from DAE (Department of Atomic Energy) India.

An investment required to develop it. I think we should form a joint venture company to collaboration with our business partners and bring this kind of technology into existence. So, I want to take the project to an international level. We want to make this device available to the public in the next 2 years.

Due to the limited resources, I have, I am unable to take this project ahead, so I request our business partners to cooperate and help me to develop this technology that can be given as a gift to your future world. I hope that you will cooperate to make this technology available. You can contact me for more details.

Thanking you,

Yours obediently,  
Basoji Suresh Ram
